## PROFESSIONAL SUMMARY

Final-year Mechanical Engineering student at NSRIET with 6 months of industry experience at Isuzu Motors India. Proficient in AutoCAD, CATIA, TinkerCAD, 3D printing, and Arduino-based robotics. Currently pursuing SolidWorks and Advanced AutoCAD certifications. Served as President of the Mechanical Student Association and recognized for technical and communication excellence. I am eager to kick-start my career in core mechanical or automobile engineering and grow fast.

## INTERSHIP EXPERIENCE

**Trainee Engineer** | **Isuzu Motors India Pvt. Ltd.** | 6 Months

- Gained hands-on exposure to automotive manufacturing processes, assembly line operations, and production planning workflows.
- Contributed to quality assurance checks, supporting plant operational efficiency and real-time production monitoring.

## EDUCATION

**B.Tech – Mechanical Engineering (Pursuing)** — NSRIET | CGPA: 7.1 | 2024 – 2027

**Diploma – Mechanical Engineering** — Government Polytechnic College | 2021 – 2024

**SSC (10th Standard)** — Sri Chaithanya Techno School | 100% | 2021

## TECHNICAL SKILLS

**CAD & Design:** AutoCAD, CATIA, TinkerCAD, SolidWorks (Learning)

**Programming:** Java (Basics)

**Manufacturing:** Additive Manufacturing, 3D Printing & Design

**Tools & Software:** MS Office, Arduino IDE

**Soft Skills:** Leadership, Team Management, Event Coordination, Communication

## CERTIFICATIONS & COURSES

AutoCAD • Java Basics • 3D Printing & Design • JNTUGV ATL Mentor

## PROJECTS

**Smart Waste Segregation System – AI-Powered Classifier** [MATLAB]

- Built an automated waste sorting system achieving ~85% classification accuracy, reducing manual sorting effort by an estimated 60%.

**Bluetooth-Controlled Robotic Car** [Arduino, Bluetooth Module]

- Engineered a wireless robotic car with stable control up to 15m range and response latency under 1 second via mobile interface.

**2D CAD Mechanical Drafting** [AutoCAD]

- Produced 5+ industry-standard mechanical drawings with precise dimensions, layering, and ISO-compliant annotations.

**Wheel Driven Reciprocating Mechanism for Pesticide Spraying** [MATLAB]

- Developed a manual sprayer that converts wheel rotation into reciprocating motion for continuous, energy-efficient pesticide spraying without external power.

## LEADERSHIP & ACTIVITIES

- President, Mechanical Student Association – Spearheaded technical events, student initiatives, and departmental representation.
- College Event Coordinator – Led cross-functional teams of 20+ to execute technical & non-technical events under tight deadlines.
- ATL Mentor, Atal Tinkering Lab – Guided students in STEM innovation projects, fostering creative problem-solving skills.
- Participant – 3D Printing Workshop & Robotics Workshop, gaining applied manufacturing and automation knowledge.

## AWARDS & RECOGNITION

- Best Communication Skill Appreciation Award (Soft Skills) – iGenuine
- Best CATIA Learner Appreciation Award (Technical Skills) – iGenuine
- Best Java Learner Appreciation Award (Technical Skills) – iGenuine

## HOBBIES & INTERESTS

3D Modeling & CAD • Exploring Mechanical Systems • Photography • Video Editing • Music & Singing

*I hereby declare that the above information is true and correct to the best of my knowledge.*
